**Energy Conservation Kit Available to Residential Customers of
FirstEnergy's Ohio Utilities**
**Customers can receive a variety of energy-efficient items that can be easily installed
in the home**

Akron, Ohio – Residential customers of FirstEnergy Corp.'s (NYSE: FE) Ohio utilities (Ohio Edison, Toledo Edison and The Illuminating Company) can sign up to receive an Energy Conservation Kit, which includes information about saving energy and a variety of energy-efficient items that can be easily installed in the home to save on lighting, heating and cooling, water or other energy-related costs.

Kits are available at no additional cost and include energy-efficient LED light bulbs, LED nightlights, a furnace filter whistle and other valuable energy-saving components. Customers with electric water heaters may be eligible to receive additional water-saving products, such as a low-flow showerhead or faucet aerator. Visit www.ohioenergykit.com or call 1-888-793-6768 to request a kit. Customers will need their utility account number to place their order.

“The Energy Conservation Kit makes saving energy at home easier and more affordable,” said Wade Williams, manager of residential energy efficiency programs for FirstEnergy's utilities. “With valuable energy-saving tips and equipment, the kit provides additional tools to help our customers manage their electricity use and make simple improvements to save energy throughout the home.”

Additional energy efficiency programs for residential customers of FirstEnergy's Ohio utilities, including Home Energy Audits and incentives on HVAC equipment and upgrades, are expected in the coming months. For information about the energy efficiency programs offered by FirstEnergy's Ohio utilities, visit www.energysaveOhio.com.

FirstEnergy is dedicated to safety, reliability and operational excellence. Its 10 electric distribution companies form one of the nation's largest investor-owned electric systems, serving customers in Ohio, Pennsylvania, New Jersey, West Virginia, Maryland and New York. The company's transmission subsidiaries operate more than 24,000 miles of transmission lines that connect the Midwest and Mid-Atlantic regions.
